THE UFOLOGER

Vol. 2, No. 1

A Monthly Saucer Publication

Dec. 18, 1957

Introduction by Robert K. Krandall

The UFOloger is a monthly saucer publication, printed in Washington, D. C. by Jim Villard and Dan Washburn.

The UFOloger is dedicated to try to bring to the public the facts--- the facts that there is something in our skies, something which we don't understand yet. We try to be completely impartial to both sides of the argument; one side stating that the flying saucers or UFO's are real, and that they are intelligently controlled - the other side saying that there are no such objects at all.

The Editors of this magazine feel, however, that there really is something "up there", and that the saucers do come from outer space.

The subscription rates to The UFOloger are: \$2.00 for a 6 issue subscription, and 35¢ for a sample or single copy. Back issues are available for 35¢ per issue.

We will publish any letters sent in by our readers to the Editors, space providing. We are always looking for new material, so any articles our readers would care to submit will be most gratefully received. Any photographs received will be printed.

Saucers and Peace by Darold Powers

Upon learning that a sputnik was circling the earth, the theory that flying saucers are manufactured on earth was forcibly brought to mind. With Russia's dynamic proof of air advances, I wondered whether the public would now include Russia among the possible origins of flying saucers. The argument that Russia would not test secret weapons over U. S. territory does not rule out the possibility that some U. F. O. 's recently seen over parts of the world outside our radar warning system could have been Russian.

With sputnik-watchers out in force, more U. F. O. 's will be seen and reported. Recognizing public suspicion that today's saucers could be Russian, the Air Force will be more diligent to place the new crop of sightings into the "known" category. To admit the existence in our skies of aircraft of unknown origin and superior operation would make an acutely sputnik-conscious nation all the more uneasy.

The heightened world stress spotlighted by the sputniks and our "call to arms" reaction to them, emphasizes the need for the greater international cohesiveness which might result where we would realize that we are not alone in the universe. It now appears that at the very time when we perhaps most need the constructive shock of universal perspective, we will be denied it. The launch-

con't. form pg. 1)

ing of the sputniks may well have killed any intention the Air Force ever had of telling where the U.F.O.'s come from --- if it knows.

Although we hope knowledge of an extraterrestrial origin of saucers would encourage our peace efforts, it is nonetheless possible that we have passed the point of encouragement and that such a revelation would only add to the international pool of fear and insecurity and increase world stress.

Saucers contribute indirectly to peace because of the confidence and creativity their presence and portent usually arouse within Ufologers. Through a study of Ufology and related phenomena, many individuals have come to an awareness of the heights to which the spirit of man may yet rise. These men must become the yeast which will raise the level of civilization, the salt which will make life once more savory. It appears that two opposite forces are struggling for the minds of men. One force is both the cause and product of the cold war; it would bring civilization to decay. The other force, epitomized by the characteristically high spirituality of most messages attributed to spacemen, would lift civilization into a golden age of peace.

To most Ufologists, saucers signify that mankind may receive help from other worlds to prevent war; but will flying saucers go so far as to prevent our annihilation in case of thermo-nuclear warfare? Let's review some messages on this subject attributed to spacemen:

Spacemen will intervene in case of war to protect any country which places trust in God and Christ, according to "In Days To Come" by Ashtar (Page 1).

If earth chooses war, spacemen will interfere as soon as the multitude calls upon God for help, states "Into This World And Out Again" by Van Tassel (page 43).

"We have not wanted to interfere with men of Saras (earth) before. All men must make their progress wherever they are. But we cannot stand by and see another waste" --- "The Saucers Speak", Williamson and Bailey (page 45). On page 47, the messages indicate that some chosen ones will be removed from earth.

In the case of Armageddon, the etherians will be on hand to aid the good men of earth, according to "The Secret of the Saucers" by Angelucci (page 124).

"We will not stand by and see this earth destroyed. . . . We shall, if necessary, use powers beyond your knowledge to preserve the earth and those who will be chosen to become leaders in the New Age dispensation. . . . We shall move swiftly to purify the leaders of destruction when the Supreme Commander gives us the command" --- "Visitors From Space", Drake (page 34).

Etherians and saucers will be in our skies until there's no more threat of war, states "The Coming Of The Guardians" by Layne (page 58).

Several other books indicate that, in case of natural cataclysm and/or war, we would be removed from earth.

In a world where hope is at a premium, these promises are received with gratitude, even though there is some doubt about their origins. But rather than sitting back to "let Ashtar do it", let us use the confidence and creative imagination engendered by Ufology to stir civilization to itself create peace.

EDITORIALS.....

Your Editors feel that the preceding article by Mr. Powers is one of the best we have ever published. We are looking forward for more articles from him in the future.

This month marks the end of another year -- 1957. What has occurred during this tenth anniversary of "saucerdom"?

This year has seen a terrific increase in activity. Hundreds of saucer clubs all over the world have been formed by those seriously interested in the UFO enigma. Many more saucer publications have sprung into existence, including, The UFO-loger.

Here in Washington, the nation's capitol, Washington Saucer Intelligence has been formed, and under the guidance of Major Wayne S. Ahò, has been doing a great deal to interest Congress in saucers.

This November saw the 1957 "Winter Flap" of saucer sightings. All of a sudden saucer sightings hit the wire services, and the nation's newspapers. But it all ended as swiftly as it came. Perhaps this was due to the fact that censorship has clamped down once more. Let's see some action around here!! We all say, "I wish we could see some action," and then do absolutely nothing about it. If you want to see some action, you've got to help get it. Don't think that someone else is going to work, because they are thinking that someone else will do what you're thinking they will do.

Write letters to your Congressman! Write letters to your local newspapers! Every little bit can help! The leaders cannot do the job alone. A great deal depends on you, the saucer fan. We ask for your help. In this issue is a sample letter you could send to your

Congressman.

George Hunt Williamson, author of "Other Tongues - Other Flesh", lectured here in Washington on December 10. There was a huge turnout for this meeting, considering it had been postponed from the previous week because of weather conditions. Travelling with Mr. Williamson on his tour of the country is John McCoy, whose book, "They Shall Be Gathered Together", is reviewed elsewhere in this issue. By the way, we hope to have an article by Mr. McCoy in the near future.

We see by the papers that the British have discovered a way to harness the heavy hydrogen in water to produce unlimited power. In view of this, we wish to call to our readers' attention the fact that Mr. Otis T. Carr, of Baltimore, Md., has discovered a new source of energy which may be similar to what the British have discovered. He has been to the Pentagon, and has talked with many leading scientists. We hope to be able to bring you more about this in future issues.

We have come to the end of another year of secrecy. Many have said that the veil would be lifted, but as yet there has been no sign of any such happenings. Perhaps this is due to the fact that Russia has launched a satellite, and that it looks as if the U. S. might become a second rate nation.

But is it a veil of secrecy? Perhaps the thought that is slipping into my mind might be true. Suppose there are no saucers, and we all are a bunch of crackpots! But, of course, we believe the obvious evidence ---- there isn't the slightest doubt in your Editors' minds that saucers are real.

There is a task before us, and it is not a small one. It is the task of

getting the world to realize that the saucers are here. A man said to your Editor, "I called 'em all crazy crackpots, until I saw one myself. Now they call me a crackpot." This is another problem facing us today. Many people see these objects, but are afraid to tell anyone about their sighting, because if they do they feel that they will be ridiculed, and lose friends. If these people would all come out into the open and say what they saw, perhaps then there would be more interest. A recent poll showed that a large percent didn't even know what saucers are! It is hard to reach the public as a whole. Great efforts are being made, however. A few months ago saw a new saucer magazine on the newsstands all over the nation, called "Flying Saucers", edited by Ray Palmer. But this is not enough. There are three or four radio stations here in the U. S. which broadcast saucer information, but still this is not enough. It is up to you, the saucer fan, to help broadcast the truth about the UFO's. Try and get local radio shows going, hold conventions, interest your neighbors in going to a saucer meeting. We will almost guarantee that if you can get them to go once, they'll come back for more. Your Editors have found out that once you get interested, you can't back out. It's just too big.

Well, so much for the Editorials. We hope that you will be back with us next issue, when we hope to have some very interesting material about a landing at Flatwoods, W. Va., where the famous Flatwoods monster was seen several years ago.

Saucer stickers are available from UFOloger Headquarters for \$1.10 for a package of 200. These stickers say, "F. S., Fact Not Fiction".

The following is a letter to the 85th Congress. It is written by Bryant and Helen Reeve, who had an article in our last issue. It has been distributed among the members of Congress, and perhaps will help to incite some interest. It is reproduced courtesy Washington Saucer Intelligence.

ARE YOU WILLING TO HAVE VITAL INFORMATION KEPT FROM YOU?

What is the purpose of our government secrecy on the subject of UFO's? Millions of Americans know information is withheld from them. They also are aware that the Brazilian Air Force has conducted open public discussions of the subject. Americans are intelligent and we are capable of evaluating information ---- if it is not withheld from us. The time has come to open the files. This information is too important for America and for the world to be bottled up as a secret. May we have action, please, from you---- our elected representatives in a democratic nation?

The following is an excerpt from Part II of "FLYING SAUCER PILGRIMAGE", a book by Bryant and Helen Reeve, published by Amherst Press, Amherst, Wisconsin.

National Governments and Flying Saucers

This leads us to a discussion of national governments and their attitudes toward the flying saucer phenomena. Of all the questions asked us, one of the most common has been, "Why don't the great national governments of the world openly acknowledge flying saucers and tell the people what they know about them? Certainly this is a reasonable, natural and legitimate

question, and it deserves a great measure of intelligent consideration.

May we say at the start that some governments and some nations are far more open in regard to flying saucers than others. Canada, England, and some countries "south of the border" are among those more openly interested in the subject. As stated before, the Brazilian Air Force held a convention on flying saucers in 1954. Outside of the dictatorships, the greatest official secrecy seems to us to exist in the United States of America, which oddly enough is supposed to be the most democratic nation on earth.

What is back of official secrecy in national governments? We diligently made a collection of reasons during our pilgrimage gathered from many sources, including talks with saucerers, professional men, educators, military men, government officials, diplomats and just ordinary people. Incidentally, whenever we found a well informed individual or group, all of them without exception were convinced that the governments know far more than they are giving out ---- far more, in fact, than most individuals know about the subject. This seemed possible to us because a government ordinarily has more sources of information than any individual. Part of our collection of reasons is as follows:

1. They----the governments---are afraid.
2. Flying saucers and their implications are a threat to the unrestrained "sovereignty" of any government on earth.
3. The saucers represent a super-power in our skies, a ceiling on earth -- man's "free will", and his sadistic and destructive tendencies. Other worlds and other beings of vastly greater intelligence are now watching our every

move. What government dares tell this to its people?

4. If a government, by suppressing the truth, can make its "enemies" think that saucers are their own secret missiles, it might be able to gain a point of military advantage.

5. If a government by suppressing the truth can gain time to duplicate flying saucers before its enemies can, it could rule the world. It might even be able to carry war into our solar system and conquer and enslave some of the inhabitants of outer space.

6. The governments are afraid to tell the people because the people, "the masses", are uneducated and ignorant and would probably panic. They recall the near panic in the U. S. A. which occurred when actor Orson Wells put on his famous radio broadcast of a fictitious invasion from Mars on the night of October 30, 1938.

7. The observed behavior of saucers (and space-beings) indicates that they represent more than a human or a physical phenomenon ---- they have a physical aspect and a supra-physical aspect. To admit this officially is "simply impossible" at this time.

8. The people have to be conditioned for the truth about saucers because the truth is so transcendental. Therefore let the "little people" --- the saucerers, the moving picture producers, the space-fiction writers, and space-comic artists, do the educating and the conditioning. When the time is ripe, then and only then release "official" information.

9. The governments have a shrewd policy: make the saucers as controversial as possible. Encourage, then deny. Blow hot, blow cold, but keep blowing. Stir up argument and

and controversy ---the more the better. It is the best way of educating the people before the official announcements can be made.

10. The governments do not know enough about saucers yet to make any kind of an official announcement.

They are puzzled and doubtful. Therefore they should keep investigating secretly until enough certainty is developed upon which official announcements can be made.

11. It would be bad economic policy to let the people know about flying saucers because the space people have solved their economic problems but our world is controlled by "monied interests" which wish to hang on to the status quo here on earth because it is profitable.

12. Security reasons ---- mysterious, unsubstantiated, unexplained, but presumably enough said.

13. The governments are secretly hoping that the annoying flying saucers will go away and leave them to their own devices.

Comment on Collection of Reasons

Many people seem to be looking for just one big simple reason to explain all the secrecy. Which of the reasons given is correct, they ask. We doubt if any one reason explains the entire situation. Different nations have different reasons which, to those in authority, naturally seem good and sufficient. We believe that all the reasons given contain at least part of the truth, some, of course, more than others. Some obviously apply to dictatorships and some to democracies. We have given you a basket of reasons. Dip in, and help yourself!

You may ask: "How do I know that these reasons are "official"?"

There we have it ---- that insistence which many people demand for "authority" outside of themselves.

Their own mind, their own capability to think, to reason, to investigate, to know, is never enough! They always depend on others to tell them. Nothing can ever be true unless some outside authority --- some government, some university, some professor, some church, some minister or priest says: "This is it!" All the while they do not see that we are dealing with a subject so new, so out-in-front, that even eminent authorities cannot give us the answers we would like. We ourselves discovered some time back that if you want the truth about flying saucers, you have to get busy and find it out for yourself!

One of our acquaintances stated that he was a U. S. citizen by birth and questioned why the U. S. did not take the world lead in saucer phenomena. He did not like the policy of secrecy and wondered why anything had to be hidden. We were amazed that we had actually run into one U. S. citizen with the fortitude to say he did not like the present U. S. policy of secrecy on flying saucers, and had suggested that perhaps we should compile a list of reasons as to why the secrecy policy should be abandoned. A sort of "saucer bill of rights" for the American citizen should be developed!

The following nine reasons were thus developed with his help as to why the U. S. A. at least should change its policy of saucer secrecy:

REASONS AGAINST GOVERNMENT SECRECY

1. The U. S. Government has as yet never even made an adequate public acknowledgment that the flying saucer phenomena even exists. The entire matter has been

left to Defense officials whose hostility, evasive tactics on the public double-talk have branded them as the wrong people to handle so cosmic and transcendental phenomenon.

2. The whole approach of the U. S. Government to this phenomena is inadequate, and its failure to recognize the interest of the American people in it and their Constitutional right to know about it through adequate Government action is to be deplored.

3. The little that has been done, instead of being shared with the American people as is their Constitutional right, has been on a secretive basis --- another indication of a frightening modern tendency toward growing "secrecy" in our American Government.

4. Secrecy in Government is abhorrent in our democracy, a violation of the very principles upon which it was founded. Secrecy is creeping into our institutions through defense measures to a point where "classified and top-secret" information is now considered as "normal". The insidious effect of this growing secrecy upon our democracy goes on almost unchallenged.

5. It is high time that our government officials; including our military leaders and atom bomb scientists, be reminded that they are still "servants of the people".

6. The saucer situation is a reminder to us of this growing tendency on the part of public officials, once they are elected by the people, to immediately "look down" upon the electorate as ignorant masses who cannot stand the truth about anything. They then set themselves up as

self-constituted judges of what the people should or should not be told.

7. The saucer situation is another indication that every year a greater wedge is being driven by these mistaken governmental policies of secrecy between the American people on the one hand and government officials and scientists on the other hand. We are rapidly getting into a frightfully dangerous situation where our population falls into two classes: a small group of know-it-alls who govern and decide everything, and a great mass of people who are kept in ignorance or semi-ignorance of what goes on behind the scenes. This is not a democracy, and it is not in keeping with the principles on which this nation was founded.

8. The very "psychology" of saucer secrecy is wrong. If there is anything that separates a people from a government, it is "official secrets". It means the people are no longer a real part of the government.

9. It has been said that U. S. Defense officials are afraid that the American people will panic if the truth about saucers is released. They remember the Orson Wells affair. What a slur this is on the integrity, stamina and courage of a mighty people. What a false psychology! It is this very policy of secrecy which in itself breeds fear, forboding and distrust of government in the hearts of the people.

We also sat down and endeavored to outline a more constructive governmental program as follows:

CONSTRUCTIVE PROGRAM FOR FLYING SAUCER PHENOMENA

1. Let the U. S. A. acknowledge

the saucer phenomena to the American people and to the world. That alone would be a tremendous forward step and a welcome clearing of the atmosphere.

2. Completely reverse the stupid policy of hush-hush, double-talk and hot and cold. Get rid of the insidious secrecy and evasion. Give up the idea that public officials are God-appointed judges of what the people should or should not know. Get back to true psychology -- that of mutual confidence and trust between the government and the people. Get back to fundamentals -- a government of the people, by the people, and for the people. Get back to the idea that government officials are servants of the people -- all the way through, even the gentlemen in the Defense Department and the scientists.

3. Take the handling of the U. S. Government saucer program and its infinite cosmic implications out of the hands of the military. They have shown themselves incapable of anything but cheap and ridiculous "evasive action". It does not belong in their basket. It is far too big for them. Let them retain whatever participation they need for defense, but get the whole program out of the limitations of the Defense Department.

4. In the name of democracy, establish a new U. S. Government commission adequately constituted to represent and report to the American people on this terrific phenomena. Make this commission adequate to take the world leadership in this field. Make the personnel of this commission representative of all groups of people and sympathetic to the phenomenon. Then and then alone will we begin to get results.

5. Here are some of the things a new and adequate flying saucer

commission could do:

a.) Obtain all the files of the secret investigations and data that have thus far been hidden from the public in an orderly and non-frightening manner, make a sensible release of this information to the public. Out with it, and never fear the consequences. The American people will welcome it,

b.) Publicly encourage people everywhere to report all possible saucer information to this new commission as a public clearing-house for accurate saucer information. From our own experience we know that worldwide information would flow to it like a magnet. Report findings to the people.

d.) Take the restrictions off of private and commercial pilots and Air Force personnel, and bring forth their saucer sightings and experiences to the public.

e.) Encourage universities and astronomical laboratories to develop new equipment to help unravel the mysteries of outer space. Stop the secrecy in these institutions. Also give their saucer photographs and data to the American people.

f.) Encourage all possible channels of communication and contact with space people, not neglecting telepathy, e. s. p. (extra sensory perception) and other methods. Get the radio hams going full blast --- and see what they turn up. Get back to audience participation -- i. e., public participation in this great adventure. Report to the people.

g.) Give official encouragement to saucer clubs, saucer lectures, and other saucer activities.

h.) Speed up our efforts to get to the moon first. Give heed to some of the telepathic and e, s. p. messages for needed knowledge on all the factors involved. The conquest of outer space is very important for

our future, and the nation that is progressive enough to prove out new sources of cosmic information is the nation that will get there first!

WHAT MIGHT HAPPEN IF
THE AMERICAN PEOPLE ARE
NOT AWAKENED

Would it not be an historic travesty if someday history had to record the incredible fact that America --- the land of the free and the home of the brave --- had muffed this great cosmic opportunity to lead the world into the knowledge of, and participation in, a community of planets and a magnificent interplanetary civilization! Wake up American citizens, wake up!

A Notice To Our Readers:

In the next UFOloger, we plan to improve our magazine as a whole. You will find that there will be pictures and an improved quality of paper.

BOOK REVIEWS

They Shall Be Gathered Together,
by John McCoy, \$2. 50.

This is an interesting book which, among other things, has a report on the activities of The Brotherhood Of The Seven Rays. It has many

articles which your editors found both interesting and enlightening to read. It also contains the stories and affidavids of several contacts with space people.

A book which all saucer fans should read. Obtainable only from John McCoy, Box 3433, Corpus Christi, Texas.

Other Tongues - Other Flesh, by
George Hunt Williamson, \$4.00,
Amherst Press, Amherst, Wisc.

This is a highly controversial book, acclaimed by some, poo-pooed by others. We are acclaiming it. The author of the book has spent several years in Peru searching for the Lost City of an ancient Pre-Inca tribe, said to have been in contact with saucers.

It is highly informative, and gives much startling information that is really very interesting. This book is an absolute MUST for any saucerer.

EDITORIALS... (Con't)

Recently it was brought to our attention that objects have been seen recently over the Cape Carna-veral Missile Base. This fits in with a tape heard by Washington fans several months ago, which stated these saucers would be seen. The tape was by Enett Brady, who is a trance medium through whom the saucers speak. Several of the predictions made by these space people have come true, which makes your Editors very glad to be in on this. You will remember, those of our readers who were with us several issues back, that we printed a statement made by Bob Ewing, who is working closely with Mrs.

Brady, saying that the Venusians would make token landings in early November. Only a few weeks after the tape was made the world was hit with wave after wave of saucer sightings which fulfilled the prophesy to an amazingly high degree of accuracy.

An informed source whose name we are not allowed to reveal told us privately that the Air Force knows what the objects over Cape Canaveral are. He said if they didn't, they would do something about it mighty fast. Perhaps the Air Force and the Pentagon knows a little more than we think it does, perhaps even to the extent that it secretly knows what the saucers are, and where they really are from!

We wish to call to your attention exactly how the Air Force phrases its words. It says that "we have no material evidence to prove that... etc., ad nauseum." They have no material evidence. That is the key phrase!! They might not have any material evidence because they just haven't been able to capture a saucer yet, hard as they try! Of course, we're drawing conclusions here, but this might have something in it after all.

Sorry: Due to lack of time, we are not able to include in this issue a sample letter as previously mentioned. However, we will have it in our next issue, which as we said before, will be a bigger and better one than ever before! Time is such a limiting factor. Your Editors find that the more we investigate, the more time it takes, and we are finding that doing the UFOloger is getting to be a full time job. Once you're in you can't back out. The saucer field is expanding to ever greater dimensions, and we are positive that within the next year it will grow even bigger!!

MASTER OF THE MIND OR MASTERED BY THE MIND?

by Dan Washburn

Are you the master of your mind or does it master you? Are you bothered by petty fears and frustrations or are you one of the few people who have mastered their minds?

A large proportion of the people today are slaves of the mind, not masters of it. They do not have control over what they think. Small things get in the way of their thinking.

The mind is a tool, a keen-edged sword of reason. Unfortunately, most of the people today do not know how to wield it. Distractions get in the way of the blade of reason and dull it.

The object of mind mastery is to train the mind to concentrate completely. When the mind is mastered in this way it becomes an invincible ally, and your friend instead of your enemy.

Complete concentration not only frees you from momentary distractions but also from the larger distractions in overall living, since you are able to impress good habit patterns on your subconscious mind.

You have, no doubt, noticed how while doing an uninteresting bit of work, your mind wanders on to subjects which have no relation to what you are doing. Then all of a sudden you realize that your mind is wandering and it comes back with a jerk to the subject at hand. This is a sign that you do not have mind mastery. However, most people do this quite often.

Most of the great men of history had mind mastery. Such men as the following: Ben Franklin, T. Jefferson, Albert Schweitzer,

Aristotle, Pope Pius XII, Archimedes, who was able to solve physics problems while relaxing in a tub, also many of the great philosophers.

You will be surprised at what a tremendous improvement will take place in your concentration if you will only take a few minutes each day at trying to master your mind. Here is an exercise that will help you:

EXERCISE

Each day take any small object and concentrate on it until your mind begins to wander, then force it back onto the object. Put the object down and review in your mind what you have seen. Pick the object up and explore it for details that you have missed.

Do this each day with a different object each time. You will be amazed at the improvement in your concentration.

I hope your efforts will be fulfilled.

A VERY MERRY CHRISTMAS
AND A HAPPY NEW YEAR TO YOU
ALL FROM THE EDITORS OF THE
UFOLOGER

Flash Rumor: That there is a big BIG project at Cape Canaveral this being that perhaps a ship is being readied by the U. S. to send to the moon!!!

Corrections. ~~supplement can~~
In our last issue, we stated that the new magazine called the UFO Hotwire is published by Howard Neuberger. This is not the case, as it is edited by Roger Pierce. Sorry!!

Washington Saucer Intelligence is at P.O. Box 815, Wash., 4, D.C., not Box 185.
